JUSTRITE SAFETY CANS

Counterbalance engineering offers easy, safe handling of flammable liquids.

- Fully compliant - meets OSHA and NFPA Code 30
- Passes independent rigorous testing - FM approved, UL/ULC certified. All are accepted under CARB.
- Self-closing lid controls vapors and spills.
- Full length, chemically resistant stainless steel flame arrester dissipates heat to prevent flashback ignition. Longer length allows easy, secure placement of gas nozzle.
- Large ID Zone identifies contents to reduce misuse or to designate department, shift or crew
- Leakproof, positive pressure relief cap automatically vents to prevent rupture or explosion
- Rounded steel comfort handle doesn't cut into hand
- Premium 24-gauge coated steel body and handle for maximum durability and chemical resistance
- Large 1/2" (13mm) grip lip along bottom helps support pouring
- Reinforcing ribs strengthen side walls for extra "bumper guard" protection
- Double-lock seams provide four thicknesses of steel to guard against bumps and bangs
- Durable, high-gloss powder paint finish resists solvents, corrosion and humidity
- Trilingual warning label in English/Spanish/French
- 100% tested to guarantee leakproof construction

Use color to help designate contents and segregate liquids

Type 1 safety cans are available in a variety of colors that are suitable for the storage of flammable liquids. Now it's easy to differentiate between various types of liquids and avoid costly errors when more than one type of liquid is needed at a particular worksite.

- Red is the most widely used (and OSHA required) choice for flammable liquids
- Blue cans are frequently used for storage of kerosene
- Yellow cans can be used to designate the storage of diesel fuel
